Civic Engagement Project Developer

Project Title	Civic Engagement Project Developer
Project Slimmary	Designs implementation strategy and plans for civic-engagement efforts on behalf of America's Veterans.
Country	United States

Project Description

This project seeks to put together a library of programs, projects and activities that can be accomplished by individuals, organizations, businesses, non-profits, families, faith-based organizations, etc. that will allow them to contribute to the health and wellbeing of America's Veterans, their families and caregivers in a virtual capacity. Given COVID-19, VA is evolving its volunteer and philanthropic programs to foster more virtual and remote engagement across the largest healthcare system in the country. These implementation guides and toolkits will allow for rapid development and execution of programs and services across more than 300 VA facilities, in service to an estimated 9 million Veterans.

Required Skills or Interests

Skill(s)

Analytical writing
Cultural diplomacy
Data analysis
Design thinking
Educational design
Writing

Additional Information

More than project management, this project requires an innovator possessing a spirit of wonder and curiosity, enjoys bringing meaning to ambiguity, and fostering program transformation. The potential for individuals

serving in this role to see these guides becoming part of hospital systems across the world is very high, given the use of these tools in the development of Case Studies, as well as presentations in a number of collaborative discussions in healthcare, patient experience, and volunteer and community engagement. Those interested in submitting proposals for outstanding work will be encouraged to do so in partnership with VA's Office of Voluntary Service.
